EDUCATION

University of South Florida

M.S. in Computer Science

B.S. in Computer Science; GPA: 3.74

Tampa, FL

Expected Dec. 2027

May 2026

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, C#, C/C++, React.js, Node.js, HTML/CSS, RISC-V

Tools & API: Visual Studio Code, Visual Studio, AWS EC2, GitHub, Git, MongoDB, SQL, Selenium, Postman, Axios

Relevant Coursework: Software Engineering, Machine Learning, Secure Coding, Data Structures, Operating Systems, Computer Organization, Ethical Issues/Professional Conduct, Program Design, Mobile Biometrics, Computer Logic and Design, Computer Architecture, Software System Development, Advanced OOP in C++, Analysis of Algorithms

EXPERIENCE

Sports Programs Supervisor

Recreation And Wellness Center USF

Jan. 2024 – May 2026

Tampa, FL

- Promoted respect and integrity among **20+ team members** by emphasizing sportsmanship and fair play.
- Managed **10+ challenging situations** with tact and empathy, addressing concerns through clear communication.
- Coordinated medical assistance for **5+ injuries**, implementing effective injury management procedures.

Software Developer Intern

Cisco Systems, Inc./Emircom LLC

May 2025 – July 2025

Dubai, UAE

- Configured Cisco routing protocols for enterprise systems, **maintaining 99.9%** network uptime for client environments.
- Collaborated with a **3-person** team to prototype an LLM-powered search tool for indexing **1,000+ internal files**.
- Researched **AI architectures** and selected **OpenAI** to design a scalable internal retrieval system.
- Supported an agile team of **10–15 developers**, assisting in implementation and system enhancements.

Youth Coding Mentor

St. Mark Church

May 2021 – June 2021

Dubai, UAE

- Taught JavaScript fundamentals to **20+ 6th graders** on Code.org, completing the full course within 4 weeks.
- Simplified **10+ core concepts** like variables and loops to guide students in developing a hands-on final project.
- Fostered a supportive environment, leading to **90% of students** reporting increased coding confidence by course end.

PROJECTS

GlycoTwin – (HackABull 2026) | React Native, TypeScript, Node.js, Express, Gemini API, MongoDB Apr. 2026

- Built an **AI-powered app** that analyzes food and menu images to estimate carbs and rank meals by **glucose impact**.
- Generated **insulin dose estimates** from **clinician-provided** insulin-to-carb ratios to **reduce** manual calculations.
- Reduced part of the burden behind the **roughly 180 daily health decisions** faced by diabetics, especially children.
- Built backend APIs, an **AI insights** tab with chatbot for meal analysis, pattern summaries, and **targeted guidance**.

ASL Prediction ML | Python, TensorFlow

Mar. 2026

- Developed an image classification model using **TensorFlow and MobileNetV2** to recognize ASL hand signs.
- Implemented an **80/20** train-validation split and trained for up to **15 epochs** with early stopping to prevent overfitting.
- Achieved **97.45% validation accuracy** and **0.0769 validation loss** through model tuning and preprocessing.

Automated E-Commerce Price Tracker | Python, Selenium, AWS EC2, SMTP

Jan. 2026

- Developed a **Selenium** engine on **AWS EC2** to automate price checks every **5 hours**, replacing all manual browsing.
- Increased tracking **efficiency by 75%** by automating scans across multiple e-commerce platforms.
- Integrated **SMTP** to deliver scheduled email reports every 5 hours, maintaining **100% notification reliability**.

CERTIFICATES

1st Place – Soccer Robotics Competition — E-Council (University of South Florida)

Mar. 2026

- Awarded by **Dean of Engineering** — Engineered a soccer-playing robot by integrating hardware design, control logic, and real-time decision making
